

Purpose of use

Solid Gutta Percha used for root canal filling

Preparation before use

1. Before using the product, check the expiration date and make sure there is no dirt, dust, or any foreign substance. It is strongly recommended not to use the product in case it has been hardened.
2. The user has to read and fully understand the manufacturer's instructions and then use the product.
3. Prepare all accessories and instruments required prior to the procedure.
4. Use only within the validity period of the product.

Directions for use

- 1) In order to fill a root canal, a dental professional must follow the following steps.
 - ◆ in case of a Gutta Percha Obturator
 - ① Insert a Gutta Percha Obturator to a backfill obturation device and soften it by heat.
 - ② Inject the soften and melted Gutta percha obturator into a root canal slowly and then press and compact the Gutta percha obturator by plugger instrument.
 - ③ The rest of parts should be filled in the same way.
 - ④ Take an X-ray after finishing the filling procedure to ensure the complete filling of the canal.
 - ◆ in case of a Gutta Percha Cartridges
 - ① First check the device whether it can be used with Gutta percha Cartridges.
 - ② Insert a Gutta Percha Cartridge to a backfill obturation device and soften it by heat.
 - ③ When the Gutta percha cartridge softened by a heater of root canal filling device, press the operation button and check if the melted Gutta percha obturator comes out through the tip. After that, inject the melted Gutta percha obturator into a root canal slowly and then press and compact the Gutta percha obturator by plugger instrument.
 - ④ The rest of parts should be filled in the same way.
 - ⑤ Take an X-ray after finishing the filling procedure to ensure the complete filling of the canal.

The procedure of operations listed above is a basic and essential way, according to the judgment of the dental professional or specialist, it might be changed by other way of treatment method or instrument, device used. The user can determine the procedure of operation as appropriate according to the symptoms of the patient.

Maintenance after use

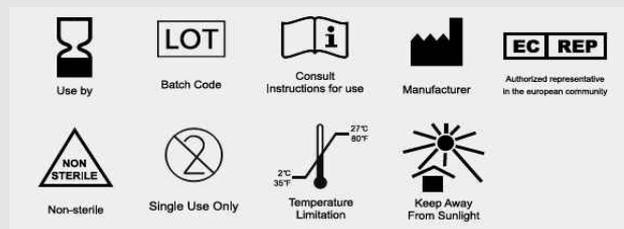

1. The remaining Gutta percha obturator has to be removed from the device and disposed.
